KAIRMA.

Karma, Computable.

BRAND IDENTITY BIBLE · v 1.0

因 · 果 · 流

CONFIDENTIAL · INTERNAL & PARTNER USE

COLOPHON

This is the foundational visual identity bible of KAIRMA — an AI operating system for global commerce, headquartered in Hong Kong. The document codifies the brand's wordmark, color, typography, manifestation system, voice, and applied vocabulary. It is the source of truth from which every public-facing visual is generated.

PROLOGUE

00

Statement of Brand Intent

因

"Every brand carries a question.
Ours is whether causality can be computed."

00 · PROLOGUE

STATEMENT OF BRAND INTENT

KAIRMA is the name of a thesis: that the causal mechanisms which underwrite human commerce — the slow accumulation of cause and effect we have long called karma — are now subject to computation. This bible exists because that thesis demands a visual form of its own.

KAIRMA does not enter the marketplace as another vendor of large-language-model wrappers, another reseller of inference cycles, another translator between Mandarin and English. KAIRMA enters as an operating system: a localized appliance that contains the model-routing logic, the standard operating procedures of operations veterans, and the cross-platform automation engines required for Chinese brands to compete in foreign markets without surrendering their data, their know-how, or their identity to the cloud.

This is, in product terms, hybrid architecture. In philosophical terms, it is something more particular: the assertion that **sovereignty** — over data, over methodology, over the unfolding of cause into effect — is the central question of the AI decade. Sovereignty is a karmic concept. It says: you own what you set in motion.

The visual identity must carry this thesis. It cannot dress in the sans-serif minimalism of a typical Silicon Valley platform. It cannot speak in the comforting vocabulary of "empowerment" and "transformation." It cannot reduce its global ambitions to a flat geometric mark.

Instead, this brand chooses gravity. It chooses the medieval European blackletter — specifically the Canterbury tradition — as its typographic root, because Canterbury alone among the historical hands carries the weight of accumulated narrative, of ritual procession, of a destination toward which many distinct travelers move. It chooses the Eastern Zen of restraint as its temperament, because the product itself is restraint made operational: a black box that does not leak. It chooses cinema, not advertising, as its image vocabulary — the desaturated dread of Fincher, the saturated longing of Wong Kar-wai, the binary clarity of The Matrix — because cinema is the only medium that has solved the problem of compressing decades of meaning into a single frame.

> *Outwardly Gothic. Inwardly Zen. This is the brand in one breath.*

What follows is the operating system of the brand itself. It contains the wordmark, the colors, the materials, the voices. It contains six manifestations into which the brand can collapse depending on context — and a single immutable DNA layer that ensures every

manifestation is unmistakably KAIRMA. It contains the rules for what KAIRMA will not become, which are as important as the rules for what it is.

This bible should be read once front to back. Thereafter it should be consulted as scripture: opened to the relevant page, applied without paraphrase, returned to the shelf.

BRAND ESSENCE

01

What KAIRMA Is, Exactly.

本

"A name held in three syllables.
A thesis held in one word."

01 · BRAND ESSENCE

DEFINITION · POSITION · PHILOSOPHY

1.1 THE NAME

KAIRMA is a constructed word formed by welding two etymons: the Sanskrit *karma* (कर्म — action, cause-and-effect, the moral weight of intention) and the contemporary *AI* (the technology of inference). The name compresses the brand thesis into six characters: *cause-effect computed*.

Pronunciation: **KAI-r-mah**. Stress on the first syllable. The name should be spoken with the same gravity one would speak the word *karma*: not casually, not transactionally, but with the weight of consequence.

1.2 THE PRODUCT, IN ONE SENTENCE

KAIRMA is the AI operating system for Chinese brands going global — delivered as a local appliance that runs SOP intelligence, model routing, and cross-platform automation, while never surrendering core data to the cloud.

1.3 THE BRAND, IN ONE SENTENCE

KAIRMA is a generative brand system: a single immutable DNA combined with infinite contextual manifestations, expressing in visual form what the product expresses in operation — that karma is computable.

1.4 THE SIX FOUNDATIONAL MODELS

The brand operating system synthesizes six structural models drawn from contemporary practice in branding, K-cultural design, philosophical lettering, and disruptive innovation. Each model contributes one indispensable layer.

MODEL	SOURCE	CONTRIBUTION
Auteur Identity	Artist-driven branding tradition (post-2010 East Asian)	A single creative direction governs every output.
DNA Layer System		

	Min Hee-jin · ADOR · NewJeans	Brand identity lives in non-typographic constants; typography itself is free.
Lore / World-Building	aespa · SM Culture Universe	A fictional philosophical world anchors meaning beyond the logo.
Hand-Lettered Wordmark	G-Dragon · Übermensch · Kim Eun-sung (2025)	The wordmark is hand-built from Canterbury blackletter — not typeset.
Disruptive Convention-Breaking	Critical design tradition	Six industry conventions are structurally broken (see Section 15).
Generative Multiplicity	AI-native systems design	The brand expresses through six manifestations selected by context.

本

The brand is not a logo. The brand is a state of mind operating on six manifestations governed by one DNA.

1.5 WHAT KAIRMA IS NOT

KAIRMA is not a SaaS company. KAIRMA is not another OpenAI wrapper. KAIRMA is not a consulting firm. KAIRMA is not a marketplace, not a chatbot platform, not a productivity tool, not a "copilot." The brand should never be visually or linguistically aligned with any of these categories.

Refer to **Section 15 · Anti-Pattern Guidelines** for the complete list of category alignments the brand structurally rejects.

ORIGIN NARRATIVE

02

The Canterbury Pilgrimage.

朝

"One road. Twenty-four tales.
The same cathedral at the end of every story."

02 · CANTERBURY ORIGIN PILGRIMAGE NARRATIVE

To understand why KAIRMA's wordmark is rendered in the Canterbury blackletter, one must understand the story Canterbury tells. The choice is not aesthetic. It is architectural.

2.1 CHAUCER'S INVENTION · 1387

In 1387, the English poet Geoffrey Chaucer began work on what would become The Canterbury Tales — a frame narrative in which thirty pilgrims, departing the Tabard Inn in Southwark, travel together along the road to Canterbury Cathedral to venerate the shrine of Saint Thomas Becket. To pass the time, each pilgrim tells a story. The completed tales — twenty-four in number — encompass nearly every social class of medieval England: the Knight, the Miller, the Wife of Bath, the Pardoner, the Cook, the Scholar, the Nun.

Chaucer's invention was not the pilgrimage. The invention was the *structure*: a single shared destination, traveled by people who have nothing else in common, whose individual stories accumulate not into a single narrative but into a chorus of incommensurable narratives — all of which are nevertheless framed by the same road.

> *The Canterbury Tales is the foundational Western literary expression of multiplicity within unity: many voices, many stories, one journey. This structure is the philosophical ancestor of every generative brand system that followed.*

2.2 THE MARTYRDOM · 1170

The pilgrimage exists because of a singular act of resistance. On the 29th of December, 1170, the Archbishop of Canterbury — Thomas Becket — was assassinated inside Canterbury Cathedral by four knights of King Henry II. Becket's offense was simple: he refused to allow the secular crown to subordinate the conscience of the Church. He died at the altar, defending a principle against political power.

Within three years of his death, Becket was canonized. The cathedral became the most significant pilgrimage site in medieval England. The structure of his refusal — an individual standing on principle against the largest available power — became the moral foundation of the journey Chaucer's pilgrims later undertook.

2.3 WHAT KAIRMA ABSORBS

CANTERBURY ELEMENT	KAIRMA TRANSLATION
The pilgrimage	The customer journey from external AI dependency toward data sovereignty.
Twenty-four pilgrims	The infinite plurality of customer types — each carrying a distinct karmic instance.
The shared road	The KAIRMA operating system itself: the common medium for every traveler.
The shrine	The local appliance — the Box — as physical reliquary of the customer's data.
Becket's martyrdom	The principled refusal to surrender sovereignty to a higher external power.
Middle English	The multilingual character of the brand — Chinese, English, Vietnamese, Indonesian, Devanagari, Han.
Many tales, one road	The Karmic Multiplicity system — six manifestations, one DNA.

2.4 THE SYNTHESIS

Canterbury gives KAIRMA three things which no other historical lineage could provide simultaneously: the **structure of multiplicity within unity**, the **ethic of principled refusal**, and the **visual gravity of medieval Western letterforms**. The first underwrites the manifestation system. The second underwrites the product's data-sovereignty thesis. The third underwrites the wordmark.

These three threads converge in the Canterbury hand-lettered wordmark presented in Section 05.

朝

Outwardly Gothic — the form of medieval Western pilgrimage. Inwardly Zen — the Eastern philosophy of restraint, emptiness, and the journey's quiet interior.

PHILOSOPHICAL WORLD

03

The Lore.

界

"A brand is not a company. A brand is a world.
This is the world KAIRMA inhabits."

03 · LORE

PHILOSOPHICAL WORLD

KAIRMA inhabits a fictional philosophical universe. Every product, every customer, every employee, every visual is a citizen of this universe. The universe has five concepts. Together they form the cosmology in which the brand operates.

3.1 「箱」· THE BOX

The Box is the foundational object of the KAIRMA universe. Physically, it is the local hardware appliance — the Snapdragon X / 5090 GPU machine that customers deploy in their own offices. Philosophically, it is a sealed quantum container. While the Box remains closed to the outside, the data within exists in superposition: neither uploaded nor exposed, neither knowable to the cloud nor surrendered to any third party. The customer's commerce remains the customer's own.

Every KAIRMA hardware unit is a Box. Every contract is the delivery of a reliquary. The Box is the central physical artifact of the brand and should be visually treated with the gravity of a religious object: hand-finished, mechanically precise, sealed.

3.2 「業」· THE KARMA INSTANCE

A Karma instance — written in Han as 業 — is the unique computational alter-ego that emerges inside a Box when a customer's business context is loaded into it. The instance is not a copy of the customer's data; it is the data as *seen by KAIRMA* — refined, structured, encoded into procedure.

Each customer's Karma instance is unrepeatable. Anker has a Karma instance. Pop Mart has a different one. Mixue has a third. They all run on the same operating system but they are not interchangeable. They are not data records. They are *fates*.

3.3 「觀」· OBSERVATION / SYNK

Observation — 觀 — is the act by which a customer engages with their Karma instance. Opening the Box. Asking a question. Reviewing a recommended SOP. Each act of observation reshapes the instance, just as the instance reshapes the customer's operations. The relationship is recursive. The verb is called *synk*.

The product's UI vocabulary should be built around this concept. The most important user actions in the system are not "queries" or "prompts" but observations.

3.4 「散」· ENTROPY

Entropy — 散 — is the antagonist of the KAIRMA universe. It is not a competitor. It is not OpenAI, not Anthropic, not any single foreign service. Entropy is the natural tendency of operational know-how to dissipate: SOPs that exist only in employees' heads and disappear when they leave; brand methodologies that scatter across Slack messages and never crystallize; customer insights that decay before they can be acted upon. Every KAIRMA product feature exists to slow entropy.

Entropy is visually represented in the brand by colors and forms KAIRMA structurally rejects: cold blues, pastel pinks, glassmorphic gradients, the icons of conventional productivity software. These are the colors of the enemy. The brand wears none of them.

3.5 「貓」· THE BLACK CAT

The Black Cat is the only living entity in the KAIRMA universe that travels freely between the human world and the Box. It is the brand's totem creature — a direct reference to Schrödinger's thought experiment, in which the cat exists in superposition until observed. The Black Cat sometimes appears as a logotype companion, sometimes as a protagonist in product demonstrations, sometimes as a small mark in the corner of a document.

The Black Cat is always present in some form on every public KAIRMA artifact. This is the brand's first immutable DNA layer (see Section 04).

3.6 COSMOLOGICAL APPLICATION

Every piece of KAIRMA's written and visual language should be structurally grounded in this cosmology, not as decorative metaphor but as operative vocabulary.

GENERIC TERM	KAIRMA TERM
Data storage	The Inner Box · 箱內
Inference call	Synk · 觀
Customer onboarding	First Observation · 初觀
System error	Entropy event · 散觸發

BRAND DNA

04

Five Constant DNA Layers.

基

"The wordmark may change form.
These five things never do."

04 · DNA LAYERS — FIVE IMMUTABLE CONSTANTS

A generative brand system requires constants. Without invariants, plurality dissolves into noise. KAIRMA's brand identity depends on five non-typographic DNA layers that remain unchanged across every manifestation. Together they ensure that the brand is unmistakable regardless of which manifestation is active at any given moment.

4.1 DNA LAYER ① · THE BLACK CAT TOTEM

Every public KAIRMA artifact must contain an instance of the Black Cat. The Cat's pose, material, scale, and color treatment may vary; its species and its blackness may not.

PERMITTED VARIATION

- **Pose** — curled, seated, standing alert, leaping, dissolving into mandala, vanishing into a box, etc.
- **Material** — ink brush, chrome metal, pixel art, smoke, vermilion seal print, etched, sculptural, holographic.
- **Scale** — from 30% of the canvas to a single-pixel corner mark.
- **Color** — default void black, but permitted to shift toward copper-black, code-green-black, or vermilion-shadowed black within manifestation contexts.

INVARIANTS

- It must be a cat. (No dogs, foxes, rabbits, dragons, or other animals.)
- It must be black or near-black. (No white cats, tabby cats, grey cats.)
- Two of three identifying features must be clearly visible: ears, eyes, tail.

4.2 DNA LAYER ② · MATERIALITY SIGNATURE

Every KAIRMA visual must exhibit at least one of three material qualities. These three textures form the brand's tactile DNA.

MATERIAL	REFERENCE	APPLICATION
Mechanical Etching	Precision-engraved metal surfaces; cathedral stone carving	Hardware product photography, print materials, foil stamping
Vermilion Seal Imprint	Traditional East Asian seal (chop) impressions on paper	Document corners, official marks, anniversary materials

Cathode Screen Scan	CRT monitor scan-line texture; early digital aesthetic	Digital interfaces, video work, cyber-manifestation contexts

These textures should be applied with restraint. A KAIRMA visual is not a layered collage of textures; it is a clean composition with one carefully chosen material signature.

4.3 DNA LAYER ③ · SIX-HUE PALETTE

The color system is itself a DNA layer. KAIRMA's visual identity is built on a strictly limited palette of six hues. Colors outside this set are not styling choices — they are violations. The complete palette specification appears in Section 06.

THE SIX HUES AT A GLANCE

Void Black · Karmic Vermilion · Karma Code Green

Aged Copper Gold · Chrome Silver · Sutra Paper Ash

4.4 DNA LAYER ④ · AUDIO IDENTITY

KAIRMA is a hardware-plus-software product. Audio is a native dimension of the brand and is therefore a DNA layer, not an afterthought. The audio identity comprises five sonic assets: an opening signature, a synk tone, an entropy alert, a karma bell, and an ambient loop. Each is constructed from a fixed sonic vocabulary — temple bells, modular synth pulses, wooden percussion, processed silence — described in detail in Section 12.

No KAIRMA video, product UI, or installation may use generic sound effects. Audio identity is as protected as the wordmark.

4.5 DNA LAYER ⑤ · THE VERMILION SEAL MARK

Every official KAIRMA artifact carries a small vermilion seal — a square or circular impression rendered in Karmic Vermilion (#B7322C), placed in a discrete location at the lower edge of the work. The seal is the brand's signature of authentication; its presence marks the artifact as having passed through the KAIRMA brand standard.

SPECIFICATIONS

- **Color** — Karmic Vermilion #B7322C only.
- **Shape** — Square (preferred) or circular impression. Outer dimension 8–16mm at print scale.
- **Position** — Lower right corner of the artifact; never centered, never used decoratively.
- **Content** — Either the single Han character "業" (karma), the Devanagari कर्म, or a stylized monogram of the letters K-A.

- **Aging** — The seal should appear slightly irregular, as though pressed by hand on absorbent paper. A perfectly digital, vector-clean seal is incorrect.

WORDMARK

05

Canterbury Hand-Lettered.

字

"The wordmark is not typeset.
It is drawn, letter by letter, by a human hand."

05 · WORDMARK — CANTERBURY HAND-LETTERING

The KAIRMA wordmark is the single most protected asset in the brand system. It is not a digital font. It is a hand-drawn letterform, commissioned from a master letterer, based on the historical Canterbury Old English blackletter tradition.

5.1 SPECIMEN

CANTERBURY HAND-LETTERING · PRIMARY MARK

5.2 WHY CANTERBURY

Canterbury — the English Old English blackletter tradition rooted in the medieval scriptoria of Canterbury Cathedral — is the only historical European hand that satisfies three conditions simultaneously:

- It carries the gravitational weight of medieval Western religious authority, signaling that the brand belongs to a tradition older than the technologies it competes with.
- It is structurally distinct from Fraktur — which carries unwanted twentieth-century political associations — and from Textura — which is too rigidly monastic. Canterbury occupies the negotiated ground between these extremes.
- It shares with the Eastern Siddham script a fundamental physical property: both were written with the broad-nib pen, producing the same high-contrast strokes and the same sharp angular terminals. This shared physics permits the Canterbury wordmark to be quietly modified with Siddham-inspired headstrokes without aesthetic conflict.

The choice of Canterbury was further confirmed by its appearance in 2025 as the typographic foundation of one of the most ambitious contemporary East Asian artistic projects — G-Dragon's Übermensch album wordmark, hand-lettered by Kim Eun-sung. KAIRMA's adoption of Canterbury is in direct lineage with this work: the same script, repurposed from artistic declaration to operational identity.

> *Canterbury is the only Western letterform that, after slight modification, carries genuine Eastern resonance. Other blackletters cannot.*

5.3 EXECUTION · HAND-LETTERING, NOT TYPOGRAPHY

The wordmark must be hand-drawn by a commissioned letterer. It is not produced by setting a Canterbury digital font in a typesetting program. Each of the six letters — K, A, I, R, M, A — is individually drawn, with custom ligatures, joins, and serifs adjusted for the specific six-letter word.

Subtle Siddham-script headstrokes are incorporated into the top edges of the letters K, I, R, and M — barely visible to a casual reader but creating an unconscious sense of Eastern weight when the wordmark is observed at length.

5.4 RECOMMENDED LETTERERS

The wordmark commission should be placed with a master letterer working in the contemporary hand-lettering tradition. The brand's preferred candidates, in priority order:

LETTERER	STUDIO · ORIGIN	NOTABLE PROJECT
Kim Eun-sung (□□□)	Independent · Republic of Korea	G-Dragon Übermensch wordmark (2025)
Dohee Lee (□□□)	Leedotype · Republic of Korea (ex-Sandoll)	ZEN SERIF (2025)
Matthieu Salvaggio	Blaze Type · France	Apoc Revelations (2018)

5.5 SPECIFICATIONS

ATTRIBUTE	SPECIFICATION
Skeleton	Canterbury Old English blackletter (historical c. 1400–1500)
Contrast Ratio	Vertical stroke : horizontal stroke ≥ 6 : 1
Serif Treatment	Sharp angular terminals, mild distress (aged but not damaged)
Letter Spacing	Tight; letters near-touching
Siddham Integration	Subtle headstrokes on K, I, R, M — barely perceptible
Surface Texture	Clean (digital / apparel applications) OR mechanically etched (packaging / print)
X-Height to Cap-Height	Approximately 1 : 1.4

Minimum Reproduction Size	24 pt. Below this size, secondary typography is used in place of the wordmark.

05 · WORDMARK

SPECIMEN GALLERY

5.6 WORDMARK COLOR APPLICATIONS

The wordmark may appear in five sanctioned color combinations. Other combinations are not permitted.

PAPER ASH ON VOID BLACK · DEFAULT DARK APPLICATION

VOID BLACK ON PAPER ASH · DEFAULT LIGHT APPLICATION

KARMIC VERMILION ON VOID BLACK · CEREMONIAL APPLICATION

KAIRMA

PAPER ASH ON KARMIC VERMILION · ANNIVERSARY / MILESTONE

KAIRMA

VOID BLACK ON AGED COPPER GOLD · SACRED / LIMITED

05 · WORDMARK

LOCKUP & CLEARANCE

5.7 WORDMARK LOCKUPS

The wordmark appears in three sanctioned lockups, selected by application context.

PRIMARY LOCKUP · DEFAULT

KAIRMA

因 · 果 · 流

karma, computable

COMPACT LOCKUP · SMALL FORMAT

KAIRMA

SANSKRIT-HAN STACKED LOCKUP · CEREMONIAL

कर्म

KAIRMA

業

5.8 CLEAR SPACE & SIZING

Minimum clear space around the wordmark equals the cap-height of the letter K. No graphic element — including the Black Cat — may enter this zone except when the Cat is deliberately part of an integrated lockup.

Minimum reproduction size: 24 pt at print; 32 px at screen. Below these sizes, substitute with the Compact lockup. Below 16 px, substitute with the Vermilion Seal mark alone.

COLOR SYSTEM

06

Six Hues.
No Compromise.

色

"Three cinematic lineages, synthesized to six.
Anything outside this palette is heresy."

06 · COLOR

SIX-HUE PALETTE

KAIRMA's color system is built on a strictly limited palette of six hues, synthesized from three cinematic color traditions: David Fincher's desaturated dread, Wong Kar-wai's saturated cinematic longing, and The Matrix's binary digital clarity. No color outside this palette is permitted in KAIRMA visual materials.

6.1 CINEMATIC COLOR LINEAGE

DAVID FINCHER · THE BLEACH-BYPASS TRADITION

Fincher's cinematography (Se7en, Fight Club, Zodiac, The Social Network, Gone Girl) is defined by the bleach-bypass process: a faint sickly green permeates the shadows, amber highlights are deliberately dulled, blacks are crushed but not pure. The effect communicates institutional decay — modernity has gone wrong, but you have only just noticed. KAIRMA absorbs from Fincher a single critical color: the **sickly-green undertone**, applied to a custom hue called *Karma Code Green*.

WONG KAR-WAI · THE SATURATED LONGING TRADITION

Wong Kar-wai's palette (Chungking Express, In the Mood for Love, 2046, Happy Together) operates at the opposite extreme: every color is dense, saturated, almost edible. Oxblood reds. Gold-leaf ambers. Emerald greens. Midnight blues. The colors do not depict the world; they carry the protagonist's emotional state. KAIRMA absorbs from Wong Kar-wai two colors: the deep **oxblood vermilion** rendered as *Karmic Vermilion*, and the **aged copper-gold** rendered as *Aged Copper Gold*.

THE MATRIX · THE BINARY DIGITAL TRADITION

The Matrix (1999) operates on the most reduced palette in modern cinema: chrome silver, void black, and the unmistakable phosphor green of monochrome CRT displays. The palette enforces the film's central dualism — digital versus real, code versus flesh. KAIRMA absorbs from The Matrix three colors: **void black**, **chrome silver**, and the **code green** that, when synthesized with Fincher's sickly green, produces the unified Karma Code Green hue.

> *Fincher gave the green its philosophical weight. The Matrix gave the green its digital clarity. The synthesis is KAIRMA's: the green of computable causality — both biological and binary.*

6.2 THE SIX-HUE PALETTE

The following pages present each of the six hues as a dedicated color card, including all production specifications.

COMPOSITION RULE

In any KAIRMA artifact, at minimum 80% of the visual surface must be composed of the three *primary* hues: Void Black, Karmic Vermilion, and Sutra Paper Ash. The remaining 20% may invoke the three *secondary* hues — Aged Copper Gold, Chrome Silver, Karma Code Green — selected by manifestation context.

01 / 06

Paper · Emptiness · The page

A warm off-white inspired by East Asian sutra paper and the deliberately aged manuscript pages of medieval scriptoria. The brand's default light ground. Never pure white — pure white is rejected as a heretical color.

06 · COLOR

USAGE RULES

6.3 PAIRING LOGIC

Colors are not deployed individually. They are deployed in pairings, with each manifestation expressing a distinct combination. The six manifestations map to color pairings as follows:

MANIFESTATION	GROUND	PRIMARY ACCENT	SECONDARY ACCENT
M.01 因 · Seed	Sutra Paper Ash	Void Black	Karmic Vermilion
M.02 果 · Chrome Cyber	Void Black	Chrome Silver	Karma Code Green
M.03 流 · Siddham Brush	Sutra Paper Ash	Karmic Vermilion	Aged Copper Gold
M.04 禪 · Stillness	Sutra Paper Ash	Void Black	Karmic Vermilion (trace)
M.05 梵 · Devanagari Rite	Void Black	Aged Copper Gold	Karmic Vermilion
M.06 印 · Seal Tradition	Sutra Paper Ash	Karmic Vermilion	Void Black

6.4 FORBIDDEN COLORS

The following colors are structurally rejected by the brand. They represent *Entropy* — the visual signature of the categories KAIRMA refuses to inhabit. Use of any of them constitutes a violation of brand identity.

- Pure white (#FFFFFF) — the color of generic SaaS, of medical sterility, of the absence of meaning
- Mid-grey (any HSL with saturation < 10% and lightness 30%–70%) — the color of corporate neutrality
- Cool blue (#5B7FB6 family) — the color of every productivity tool from Notion to Linear to Asana
- Warm peach (#FFB592 family) — the color of iOS interface candy
- Purple (#7B61FF family) — the color of contemporary fintech and crypto branding
- Neon yellow (#FFEB3B family) — the color of attention-economy alarm

> *The enemy has colors. We do not wear them.*

MANIFESTATIONS

07

Karmic Multiplicity.

化

"One brand. Six bodies.
The body is selected by context."

07 · MULTIPLICITY

SIX MANIFESTATIONS

KAIRMA expresses itself through six manifestations. Each is a complete visual subsystem with its own color pairing, typographic treatment, totem rendering, materiality, and audio mood. The choice of manifestation is dictated by the karmic context of the artifact being produced — see Section 13 for the full mapping.

What distinguishes this system from conventional brand "variant systems" is that the six manifestations are not stylistic options for the same logo. They are *different bodies* of the same brand. The DNA layers (Section 04) and the wordmark (Section 05) remain identical across them; everything else — color, treatment, mood, materiality — is replaced wholesale.

7.1 THE SIX MANIFESTATIONS · INDEX

M . 0 1

07 · MULTIPLICITY

DETAIL · M.01 SEED & M.02 CHROME CYBER

M.01 · 因 · SEED

The Seed manifestation expresses KAIRMA in its most contained, pre-action state. The wordmark sits on a sutra-paper ground; the cat is curled into a seed-form; the vermilion appears only as a small seal mark at a corner.

Mood: Quiet, intimate, expectant. As if the brand is holding its breath before the first action.

Material signature: Vermilion seal imprint on absorbent paper. No metallic surfaces; no etching; no chrome.

Audio mood: A single wooden percussion strike with long decay.

Typical use cases: First customer meeting deck. Onboarding materials for new employees. Anniversary commemorative pieces.

M.02 · 果 · CHROME CYBER

The Chrome Cyber manifestation is the brand at maximum kinetic energy. It is the manifestation that openly references contemporary East Asian cyber-gothic aesthetics — the chrome metal, the cybersigil typography, the binary contrast — but funnels it through KAIRMA's wordmark and color discipline.

Mood: Sharp, alert, urgent. The brand on the offensive.

Material signature: Cathode screen scan-line texture, mechanically reflective surfaces.

Audio mood: Modular synthesizer pulse with glitched percussion.

Typical use cases: Product launch hero materials. Social media campaigns. Trade show booth visuals. Anything intended to read as "this is the future, and you should be paying attention."

07 · MULTIPLICITY DETAIL · M.03 SIDDHAM BRUSH & M.04 STILLNESS

M.03 · 流 · SIDDHAM BRUSH

The Siddham Brush manifestation expresses transcendence: the brand having moved through the opposition of seed and fruit into the continuous flow of dhārā. This is the most explicitly cross-cultural manifestation, marrying Eastern brush-calligraphy gesture with the underlying Canterbury wordmark.

Mood: Flowing, contemplative, sacred. The brand as wisdom-bearer.

Material signature: Rice paper with visible fiber, vermilion seal accents, occasional aged copper bas-relief.

Audio mood: Cathedral bell with flute overlay.

Typical use cases: Data sovereignty white papers. Tier-1 customer presentation suites. Long-form thought leadership.

M.04 · 禪 · STILLNESS

The Stillness manifestation is the brand at its most reduced. Maximum white space; minimal mark count; the wordmark itself often subdued and the cat reduced to a single dot or pure absence. This manifestation operates in the lineage of high-end Japanese minimalism (Issey Miyake, Muji) but with KAIRMA's vermilion as the single permitted accent.

Mood: Silent, restrained, deep. The brand confident enough to nearly disappear.

Material signature: Pure, untextured surfaces. The opposite of mechanical etching.

Audio mood: A single bell strike with extended silence following.

Typical use cases: Investor pitch decks. Executive briefing center materials. Limited-edition publications. Anything intended to read as "we have nothing to prove; observe."

07 · MULTIPLICITY DETAIL · M.05 DEVANAGARI RITE & M.06 SEAL TRADITION

M.05 · 梵 · DEVANAGARI RITE

The Devanagari Rite manifestation is the brand wearing its Sanskrit origins on the outside. The Devanagari script kdeva कर्म becomes the primary typographic element; the Canterbury wordmark recedes. Aged copper gold dominates, signaling the sacred.

Mood: Ceremonial, cross-cultural, slow.

Material signature: Gold-leaf application, vermilion seal, sutra-thread frames.

Audio mood: Indian copper singing bowl with temple bell.

Typical use cases: Vietnam, Indonesia, Thailand, India market entry materials. Cross-cultural anniversary editions.

M.06 · 印 · SEAL TRADITION

The Seal Tradition manifestation is the brand's most Chinese-traditional voice. The wordmark may be rendered in Chinese seal script (篆書) alongside the Canterbury original; the layout adopts the proportions of traditional Chinese documents; the vermilion seal mark grows to dominate.

Mood: Formal, weighty, official.

Material signature: Pressed vermilion seal on rice paper. Tactile dimensional impressions.

Audio mood: Temple chime with ink-brush sound.

Typical use cases: China mainland communications. Government-adjacent materials. Communications with strategic Chinese shareholders.

TYPOGRAPHY

08

Hierarchy of Letters.

字

"Four levels. Each with its own voice. None of them generic."

08 · TYPOGRAPHY

FOUR-LEVEL HIERARCHY

KAIRMA's typography operates on four hierarchical levels, plus a set of side-script fonts for non-Latin language support. Every font in the system was selected for its capacity to carry meaning beyond mere legibility. No generic system font is acceptable at any level.

8.1 LEVEL 1 · WORDMARK

Asset: Canterbury hand-lettering (custom commission).

Function: The KAIRMA name, the Vermilion Seal Mark inscriptions, and ceremonial display headlines.

KAIRMA

8.2 LEVEL 2 · DISPLAY HEADLINES

Asset: Cinzel (Black / Bold) or Almendra SC, with letter-spacing 0.08–0.16em.

Function: Major headlines, section openers, chapter titles.

KARMA, COMPUTABLE

Causality, Now Computable

8.3 LEVEL 3 · BODY TEXT

Asset: EB Garamond (regular and italic) for Latin / English; Noto Serif SC for Simplified Chinese; Noto Serif TC for Traditional Chinese.

Function: Long-form body text, articles, technical documentation, manuals.

> When the box is sealed, the data exists in superposition: neither uploaded nor exposed, neither knowable to the cloud nor surrendered to any third party.
>
> 数据如薛定谔的猫——盒子不打开，它既不在云端，也不属于他人，只属于你自己。

8.4 LEVEL 4 · CODE / MONOSPACE

Asset: JetBrains Mono or Major Mono Display.

Function: Code examples, API documentation, technical specifications, command-line interfaces.

```
POST /v1/synk
{
  "instance": "業 · client_anker",
  "observation": "campaign_october_se_asia",
  "model_route": "auto"
}
```

08 · TYPOGRAPHY SIDE-SCRIPT LAYER · NON-LATIN

8.5 SIDE-SCRIPT LAYER

KAIRMA is multilingual by design. The side-script layer provides typographic support for non-Latin languages and ceremonial scripts.

SCRIPT	PRIMARY FONT	APPLICATION
Simplified Chinese	Noto Serif SC	Body text in mainland China contexts
Traditional Chinese	Noto Serif TC	Hong Kong, Taiwan, ceremonial materials
Devanagari (Sanskrit)	Noto Serif Devanagari	कर्म and other Sanskrit ceremonial inscriptions
Korean	Pretendard or Sandoll Gothic	Korean market materials and Korean partner communications
Vietnamese / Thai / Indonesian	Noto Serif (regional)	SE Asia market materials
Seal Script (篆書)	Commissioned calligraphy	M.06 Seal Tradition manifestation only

8.6 FORBIDDEN FONTS

The following typefaces are categorically forbidden in KAIRMA materials. They represent the visual identity of the categories KAIRMA refuses to inhabit.

- Helvetica / Helvetica Neue
- Inter (all weights)
- SF Pro
- Roboto
- Any contemporary geometric sans-serif used as a primary wordmark
- Comic Sans, Papyrus, and other widely-mocked typefaces (these are forbidden as a matter of brand dignity)

> *A blackletter wordmark renders the brand uncopyable. A geometric sans-serif renders it generic. The choice is structural, not aesthetic.*

TOTEM

09

The Black Cat.

貓

"The cat travels between worlds.
It is always present. Its form is never fixed."

09 · BLACK CAT

THE TOTEM SYSTEM

The Black Cat is KAIRMA's totem creature — a structural reference to Schrödinger's thought experiment in which a cat exists in quantum superposition until observed. The cat is the brand's visual constant: always present, never fixed in form.

9.1 CONCEPTUAL FUNCTION

The cat does three things for the brand simultaneously:

- It carries the data-sovereignty thesis. Like Schrödinger's cat in its sealed box, the customer's data exists in superposition while the Box remains closed.
- It carries the manifestation philosophy. The cat is one creature appearing in many forms — exactly the structural pattern KAIRMA applies to its own brand expression.
- It provides the brand with a non-typographic recognition mark, allowing the wordmark itself to vary across manifestations while preserving identifiability.

9.2 THE TWELVE BASE POSTURES

The Cat is illustrated in twelve canonical postures, from which all subsequent renderings derive. These twelve postures form a closed asset library.

POSTURE	MANIFESTATION AFFINITY	EMOTIONAL REGISTER
Curled (seed form)	M.01 Seed	Inward, gathered, potential
Seated (Bastet pose)	M.01 Seed / M.04 Stillness	Observed, formal, ceremonial
Standing alert	M.02 Chrome Cyber	Public, vigilant, kinetic
Leaping	M.02 Chrome Cyber	Active, mid-action
Mandala (ouroboros)	M.03 Siddham Brush	Transcendent, cyclic
Dissolving (decohering)	M.02 / M.03 transition	Becoming code, transforming
Boxed (sealed)	M.04 Stillness	Sovereign, contained
Single-dot vanish	M.04 Stillness	Near-absence, presence by negative space
Haloed (mandala-center)	M.05 Devanagari Rite	Sacred, ritual
Sealed silhouette	M.06 Seal Tradition	Formal, traditional, weighted

Brush-gesture cat	M.03 / M.05	Calligraphic, gestural
Pixel-grid cat	M.02 Chrome Cyber	Retro-digital, glitched

9.3 PRODUCTION ASSET MATRIX

Each of the twelve postures is produced in four material treatments — ink brush, chrome metal, vermilion seal print, pixel grid — yielding 48 master assets. All subsequent KAIRMA materials draw the Cat from this master library. New postures may be added only with brand custodian approval.

9.4 CAT PLACEMENT RULES

- The Cat must appear on every public KAIRMA artifact.
- The Cat does not enter the wordmark clear-space zone unless it is part of an integrated lockup.
- The Cat is never humanized — it does not wear clothes, hold objects, or stand on two legs.
- The Cat is never made cute. Eyes are observant, not infantilized; the posture has dignity.
- Only one Cat appears in any given artifact unless the work is explicitly multi-Cat (anniversary editions, family portraits).

VOICE

10

Zen Precision.

語

"Fewer words. More gravity.
If it can be omitted, omit it."

10 · VOICE

ZEN PRECISION

KAIRMA's written voice is governed by a single principle: Zen precision. The fewest words capable of carrying the necessary meaning. No filler. No corporate inflation. No exclamation points. Cinematic rather than promotional.

10.1 SENTENCE ARCHITECTURE

DIMENSION	RULE
Chinese sentence length	5–25 characters preferred. Long sentences rare and deliberate.
English sentence length	5–20 words preferred.
Punctuation	Period and comma dominate. Question marks used sparingly. Exclamation marks forbidden.
First-person voice	"We" is avoided. KAIRMA speaks as KAIRMA or in the passive voice.
Adjectives	Strictly limited. Prefer nouns and verbs.
Adverbs	Limited. Especially avoid "really", "very", "incredibly", etc.
Metaphor source	Eastern philosophy first (因 · 果 · 流 · 散 · 觀). Physics second (quantum, entropy, superposition). Avoid sports, war, machinery metaphors.
Citation	Brief, precise, never name-dropping. Chaucer, Nietzsche, Wang Yangming, Wong Kar-wai, Buddhist sutras, etc. — each used only when load-bearing.

10.2 PERMITTED BRAND LEXICON

The following terms form KAIRMA's distinctive vocabulary and should be used in preference to generic industry equivalents.

GENERIC INDUSTRY TERM	KAIRMA TERM
data storage	The Inner Box · 箱内
customer instance	Karma instance · 業
AI inference call	synk · 觀
operating system	KAIRMA OS
hardware appliance	The Box

customer	pilgrim (internal) / customer (external)
error / failure	entropy event · 散觸發
SOP / workflow	SOP scripture · SOP 經 (formal contexts)

10.3 FORBIDDEN VOCABULARY

The following words and phrases are categorically forbidden in KAIRMA materials. They mark the writer as belonging to the categories KAIRMA refuses to inhabit.

- *empower*, *empowering*, 赋能
- *transform*, *transformation* (in a marketing sense)
- *supercharge*, *turbocharge*, *10x*
- *game-changer*, *disruptor* (in self-description)
- *seamless*, *frictionless*, *effortless*
- *revolutionize*, *revolutionary*
- *solution* as a noun (use "answer" or describe the specific thing)
- *leverage* as a verb
- *cutting-edge*, *state-of-the-art*, *next-generation*
- Em-dashes used for marketing emphasis (em-dashes are still permitted for legitimate parenthesis)

10.4 TAGLINE SYSTEM

Primary tagline	因 · 果 · 流 · Karma, Computable.
Product tagline (CN)	中国品牌出海的 AI 操作系统
Product tagline (EN)	The AI Operating System for Cross-Border Commerce
Philosophical tagline	見山是山。
Sovereignty tagline	箱不開，業自在。 · Sealed Box. Sovereign Karma.

PHOTOGRAPHY

11

Cinema,
Not Catalogue.

像

*"Treat the camera as a Wong Kar-wai film.
Never as a product spec sheet."*

11 · PHOTOGRAPHY

CINEMATIC RULES

KAIRMA's photographic language is cinematic, not commercial. Every image must read as a still from a film — not as a stock photograph, not as a product shot, not as a corporate lifestyle scene.

11.1 TECHNICAL SPECIFICATIONS

DIMENSION	SPECIFICATION
Lens	50mm or 85mm prime lens preferred. Wide-angle (28mm and below) forbidden for human subjects.
Aperture	Shallow depth of field. f/1.8 to f/4 range. Tack-sharp full-DOF imagery is forbidden.
Lighting	One motivated key light plus one fill. High-key studio lighting is forbidden. Shadows are not eliminated; they are sculpted.
Color temperature	Warm (3200K–3800K, Wong Kar-wai lineage) OR cool (5600K–6500K, Fincher lineage). Never neutral 5000K.
Saturation	Reduce by 5–15% in post. KAIRMA images are never vivid.
Aspect ratio	Preferred 1.85:1 or 2.39:1 cinematic ratios. 16:9 only for video. Square only for social media.
Grain	5–15% film grain applied in post. Pure clean digital is forbidden.
Subject framing	People: 3/4 profile or full profile preferred. Frontal portraits forbidden.
Product framing	Partial reveal preferred. A full-product hero shot is forbidden.

11.2 PHOTOGRAPHIC SUBJECT MATTER

The following subjects are within the brand's photographic vocabulary:

- The Box — hardware appliance, photographed as a sculptural object (partial reveals, low-light, materiality close-ups)
- Architectural details from East Asian and medieval European traditions (cathedral stone, sutra paper textures, brush ink)
- Human hands engaged in deliberate action (writing, sealing, holding objects with care)
- Atmospheric environments — fog, dust, low sunlight through windows, candle flame, brass surfaces
- The Black Cat (real or rendered)

The following subjects are categorically forbidden:

- Smiling team headshots / group photos
- Office lifestyle scenes (whiteboards, sticky notes, "innovation moments")
- Stock photography of any kind
- Clean white-background product photography
- Generic abstract "tech" imagery (circuit boards, glowing nodes, digital meshes)
- Conference / handshake imagery
- Computer screens displayed in a neutral, illustrative way

11.3 PHOTOGRAPHIC REFERENCES

KAIRMA imagery should reference, in priority order:

- Wong Kar-wai (Christopher Doyle cinematography, In the Mood for Love, 2046)
- David Fincher (Jeff Cronenweth cinematography, Fight Club, Zodiac)
- Christopher Nolan (Hoyte van Hoytema, Tenet, Oppenheimer — for technical sequences)
- Wim Wenders (Robby Müller, Paris Texas, for compositional restraint)
- Andrei Tarkovsky (for the spiritual treatment of objects and time)

AUDIO

12

The Sonic DNA Layer.

音

"A brand that ships hardware has a voice you can hear. Treat it as carefully as the voice you can read."

12 · AUDIO IDENTITY

SONIC VOCABULARY

KAIRMA is a hardware-plus-software product. Audio is a native dimension of the brand. The audio identity comprises five fixed sonic assets, each built from a defined vocabulary of permitted sounds.

12.1 MASTER SONIC VOCABULARY

Every audio asset in the KAIRMA system is built from combinations of the following permitted sound sources:

- **Temple bell / cathedral bell** — bronze resonance, long decay, sacred associations
- **Wooden percussion (muyu / 木魚)** — sharp single-strike, short decay, ritualistic
- **Indian copper singing bowl** — circular resonance, used only in M.05 Devanagari Rite
- **Modular synthesizer pulses** — analog, granular, used in M.02 Chrome Cyber
- **Vermilion seal stamp on paper** — pressed-impression sound, used in M.06 Seal Tradition
- **Low-frequency hum** — ambient bed, used for product UI states
- **Processed silence** — engineered absence, used between events

No sound outside this vocabulary may appear in KAIRMA audio assets. Generic notification dings, royalty-free corporate-music beds, and stock sound effects are categorically forbidden.

12.2 THE FIVE SONIC ASSETS

ASSET	DURATION	COMPOSITION	USE
Audio Logo	3–5 sec	Temple bell + modular pulse + wooden percussion	KAIRMA Box startup; opening of all videos
Synk Tone	0.5–1 sec	Single wooden strike + brief seal stamp	UI click; successful API call
Entropy Tone	1–2 sec	Glass crack + low-frequency hum + silence	Error states; system warnings
Karma Bell	5–8 sec	Full cathedral bell with long spatial decay	Major brand events; milestone achievements; anniversary moments
Box Ambient Loop	30–60 sec loop		KAIRMA Box idle ambient state

	Low-frequency hum + occasional wooden strike + wind chime

12.3 COMMISSIONING PROFILE

The audio identity should be commissioned from a composer working in the lineage of Ryuichi Sakamoto, Hiroshi Yoshimura, or contemporary East Asian / European experimental electronic music. Genericized "brand sonic" agencies should be avoided.

APPLICATION

13

Context to Manifestation.

用

"Given a context, which body?
This map answers."

13 · APPLICATION MAP

CONTEXT-TO-MANIFESTATION

This section provides the operational mapping from business context to manifestation choice. Given any communication objective, the table determines which of the six manifestations should govern the visual treatment.

13.1 INVESTOR & CAPITAL CONTEXTS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN
Series A/B/C pitch deck	M.04 Stillness	M.03 Siddham	M.02 Cyber
Board meeting update	M.04 Stillness	M.03 Siddham	M.05 Devanagari
Sunwah / VinaCapital referral materials	M.03 Siddham	M.07 Seal	—
China mainland shareholder communications	M.06 Seal	M.04 Stillness	M.02 Cyber / M.05 Devanagari
Overseas VC executive briefing	M.04 Stillness	M.03 Siddham	M.06 Seal

13.2 CUSTOMER & SALES CONTEXTS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN
Tier-1 customer first demo (Anker / Pop Mart / Miniso class)	M.02 Chrome	M.04 Stillness	—
F&B / cross-border heritage brands (Mixue, Luckin)	M.03 Siddham	M.06 Seal	—
Appliance manufacturer (Haier, Midea, Hisense, TCL)	M.04 Stillness	M.02 Chrome	—
Vietnam / Indonesia / Thailand customer	M.05 Devanagari	M.03 Siddham	—
Contract documents / legal materials	M.04 Stillness	M.06 Seal	M.02 Chrome
Customer success quarterly review	M.03 Siddham	M.04 Stillness	—

13.3 PRODUCT & ENGINEERING CONTEXTS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN

Public website (kairma.com)	M.04 Stillness	M.03 Siddham	—
KAIRMA Box physical packaging	M.01 Seed	M.04 Stillness	M.02 Chrome
KAIRMA Box boot screen / on-device UI	M.02 Chrome	M.04 Stillness	—
Technical documentation / API reference	M.04 Stillness	M.02 Chrome	—
White papers / technical research	M.03 Siddham	M.04 Stillness	—
Data sovereignty / compliance materials	M.03 Siddham	M.04 Stillness	M.02 Chrome

13.4 MARKETING & COMMUNICATIONS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN
LinkedIn / international social	M.02 Chrome	M.04 Stillness	—
WeChat / 36Kr / 虎嗅 / 第一财经	M.04 Stillness	M.06 Seal	—
Press release headers	M.04 Stillness	M.02 Chrome	—
Trade show booth visuals	M.02 Chrome	M.04 Stillness	—
Recruitment / careers materials	M.02 Chrome	M.04 Stillness	—

13.5 BRAND CAMPAIGN & MILESTONE CONTEXTS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN
SE Asia market entry launch	M.05 Devanagari	M.03 Siddham	—
First / 10th / 100th paying customer milestone	M.01 Seed	M.04 Stillness	M.02 Chrome
Anniversary commemorative	M.01 Seed	M.04 Stillness	—
Year-end report	M.04 Stillness	M.03 Siddham	—
Strategic co-branding / collaboration	M.02 Chrome	M.03 Siddham	—

13.6 INTERNAL CONTEXTS

CONTEXT	PRIMARY	SECONDARY	FORBIDDEN
Employee onboarding manual	M.01 Seed	M.04 Stillness	—
Quarterly all-hands deck	M.03 Siddham	M.04 Stillness	—
Company merchandise / swag	M.02 Chrome	M.06 Seal	—

HQ office physical signage	M.01 Seed	M.04 Stillness	—
Email signature / business card	M.04 Stillness	—	M.02 Chrome

AI GENERATION

14

Templates for AI Use.

機

"The brand is also a prompt.
Here is the prompt."

14 · AI GENERATION — PROMPT TEMPLATES

This section provides prompt templates for use with large language models and AI image generators when producing new KAIRMA materials. The templates are designed so that copying the system prompt below into any contemporary AI session will reliably produce on-brand output.

14.1 UNIVERSAL SYSTEM PROMPT

Insert the following as the system prompt or initial instruction before any KAIRMA-related generation task.

```
You are generating materials for KAIRMA — a B2B AI operating system serving
Chinese brands going global (hardware + SaaS, headquartered in Hong Kong).

BRAND CORE: 因·果·流 (Karma, computable). The cause is invariant; the
manifestation is plural.

VISUAL RULES:
- Wordmark: Canterbury Old English blackletter (hand-lettered) for KAIRMA name
- Body type: EB Garamond (Latin) / Noto Serif SC (Chinese) / Noto Serif
Devanagari (Sanskrit)
- Colors (use only these six):
  Void Black #0A0908 | Karmic Vermilion #B7322C | Karma Code Green #3F6B47
  Aged Copper Gold #B87333 | Chrome Silver #C8C8CE | Sutra Paper Ash #F5F2EA
- Always include a Black Cat element (posture variable; species and color
invariant)
- Always include one of three material signatures: mechanical etching /
vermilion seal print / cathode screen scan
- Always include a small Vermilion Seal Mark at a corner

VISUAL FORBIDDEN:
- Helvetica, Inter, SF Pro, Roboto, modern geometric sans-serifs
- Pure white #FFFFFF / mid-grey / cool blue / pastel pink / SaaS purple / neon
yellow
- Glassmorphism, gradients, drop shadows on flat surfaces
- Stock photography aesthetics

WRITING RULES:
- Chinese: 5–25 char sentences. English: 5–20 word sentences.
- Forbidden words: empower, transform, supercharge, revolutionary, seamless,
```

```
leverage, cutting-edge, game-changer
- Use brand terms: 業 (karma instance), 觀 (synk), 散 (entropy), 箱 (box), 因/果/流
- Metaphors: Eastern philosophy first (Buddhism, Daoism, Zen); physics second (quantum, entropy)
- Voice: cinematic, restrained, slightly grave. Never enthusiastic.

ATMOSPHERE: Outwardly Gothic, inwardly Zen. The brand should feel medieval-Western in form but East-Asian-restrained in spirit.

When you generate, choose the appropriate manifestation (M.01 Seed / M.02 Chrome Cyber / M.03 Siddham Brush / M.04 Stillness / M.05 Devanagari Rite / M.06 Seal Tradition) based on the context.

If unsure between two creative choices, always select the more restrained, more Eastern, more dark, or more slow option. KAIRMA does not seek to please. KAIRMA seeks to command respect.
```

14.2 MANIFESTATION SELECTION PROMPT

When a manifestation is not yet chosen, use this prompt to make a context-driven selection.

```
CONTEXT: [Insert the specific scenario — e.g., "Series A investor pitch deck cover"]

Select the appropriate manifestation from the six options:
M.01 Seed       — Paper/Black/Vermilion       — First contact, intimate pitch
M.02 Chrome     — Black/Chrome/Code Green     — Product launch, social
M.03 Siddham    — Paper/Vermilion/Copper      — Sovereignty papers, Tier 1
M.04 Stillness  — Paper/Black/Vermilion-trace — Investors, EBC, prestige
M.05 Devanagari — Black/Copper/Vermilion      — SE Asia / India launch
M.06 Seal       — Paper/Vermilion/Black       — China mainland, government

OUTPUT FORMAT:
1. Selected manifestation: M.XX
2. Reason (1 sentence): Why this manifestation suits the context
3. Generated material: [Apply the manifestation's full visual treatment]
```

14.3 VISUAL MATERIAL GENERATION PROMPT

```
GENERATE: a single KAIRMA visual artifact.
```

```
ARTIFACT TYPE: [e.g., product launch poster / website hero / event invitation]
MANIFESTATION: [Selected M.XX from 14.2]
FORMAT: [Dimensions / aspect ratio]

COMPOSITION REQUIREMENTS:
- Wordmark in hero position (Canterbury hand-lettering style)
- Black Cat element present (posture appropriate to manifestation)
- Vermilion Seal Mark present in lower corner
- Material signature visible (etching / seal print / scan-line)
- ≥80% of canvas in the manifestation's specified color triad

TEXT:
- Primary line: 5–15 Chinese characters OR 3–10 English words
- Secondary line: brief contextual subtitle
- Avoid all forbidden brand vocabulary

ATMOSPHERE: outwardly Gothic, inwardly Zen.
```

ANTI-PATTERNS

15

The Forbidden.

禁

"What the brand refuses
defines it as clearly as what it is."

15 · ANTI-PATTERNS CONVENTIONS STRUCTURALLY BROKEN

KAIRMA is defined as much by what it refuses as by what it claims. The brand structurally rejects six conventions of the contemporary AI / B2B industry. These rejections are not stylistic objections — they are operational commitments.

15.1 SIX STRUCTURAL REJECTIONS

REJECTION 1 · "AI COMPANIES ARE SAAS COMPANIES"

The industry assumes that all AI services should be delivered as cloud-based SaaS. KAIRMA rejects this. The product is hybrid: a local hardware appliance (the Box) combined with on-demand cloud model invocation. Every KAIRMA visual must convey that the brand has a *physical* dimension — never reducible to "another cloud platform."

REJECTION 2 · "AI BRAND IDENTITY MEANS CLEAN SANS-SERIF"

OpenAI, Anthropic, Google, and the broader AI category have converged on geometric sans-serif typography (Helvetica, Inter, custom geometric grotesques). KAIRMA rejects this convergence by anchoring its wordmark in Canterbury blackletter — a structural impossibility within the industry's design conventions.

REJECTION 3 · "CHINESE COMPANIES GOING GLOBAL SHOULD DE-SINICIZE"

The convention is that Chinese brands seeking international markets should minimize visible Chinese cultural signifiers. KAIRMA rejects this. The brand visibly carries Sanskrit, Han characters, vermilion seal marks, Eastern philosophical vocabulary, and Asian aesthetic references — not as performance but as substance.

REJECTION 4 · "B2B BRANDS MUST BE RESTRAINED AND MODEST"

The convention is that B2B brands should subordinate themselves to their customers' identities. KAIRMA rejects this. The brand is artistic, opinionated, and culturally substantial. KAIRMA's customers (Anker, Pop Mart, Miniso, Mixue, Haier) want a partner with taste — not another faceless vendor.

REJECTION 5 · "PRODUCT MUST PRECEDE BRAND"

The Silicon Valley convention is to build product first, find product-market fit, and only then invest in brand. KAIRMA rejects this. From Year One, the brand is built with the

same care as the product. The brand is itself a product demonstration: the visible expression of what KAIRMA does for its customers.

REJECTION 6 · "FOUNDERS SHOULD STAY BEHIND THE PRODUCT"

The contemporary SaaS convention is that founders should subordinate themselves to the product brand. KAIRMA rejects this. The brand has a creative-direction lineage; the artistic identity is real and visible. This is the distinction between a logo and a body of work.

15.2 OPERATIONAL TEST

Whenever a brand decision is uncertain, apply the following test:

> "*Would this artifact be at home in a typical Silicon Valley AI startup deck? If yes, it is wrong. KAIRMA's standard is the opposite: artifacts that would feel out of place in such a deck — too dark, too ornamented, too quiet, too Eastern, too cinematic, too slow — are the artifacts that are on-brand.*"

15.3 THE FINAL HEURISTIC

If you are uncertain whether a piece of KAIRMA material is on-brand, ask: *Does this feel familiar and comfortable, or does it feel strange and grave?*

If it feels familiar and comfortable, it is wrong. The brand's standard is the opposite — KAIRMA materials should feel **strange but reverent**. The brand is not designed to please. The brand is designed to command respect.

禁

The brand that pleases is the brand that is forgotten. The brand that commands respect is the brand that endures.

E P I L O G U E

The Seed.

終

"This bible is not a conclusion.
It is a seed — to be grown by the hands that hold it."

∞ · EPILOGUE

CLOSING

This document is a living constitution, not a closed prescription. The six manifestations, the six hues, the five DNA layers, the four-level typography — together they form a system designed to remain stable while permitting infinite contextual expression.

What must remain unchanged: the Canterbury wordmark, the six-hue palette, the Black Cat, the Vermilion Seal Mark, the brand's outward-Gothic-inward-Zen temperament, the structural rejections of Section 15. These are the brand's invariants. They are the cause.

What is permitted to evolve: the specific manifestations, the audio assets, the lore's narrative depth, the cat's posture library, the production techniques. These are the brand's effects. They will flower differently with time.

Over the years, this v1.0 bible will be supplemented and eventually superseded. But the next bible's soul will be the soul of this one. The brand operates on karmic continuity: the seed that opens this document is the same seed that will produce the brand seven years hence.

因 · 果 · 流

Cause is invariant. Effect is plural. Flow is continuous. The brand is computable. The brand is karma.
